PROFESSIONAL SUMMARY

Highly motivated and results-driven second-year BCA student specializing in Full-Stack Web Development using the MERN Stack. Proficient in creating responsive user interfaces and robust RESTful APIs. Seeking an entry-level development or internship role to leverage hands-on project experience in a dynamic professional environment.

PROJECTS

1. ECOjute: Full-Stack E-Commerce Platform

- Technologies: React.js, Node.js, Express.js, MongoDB, JWT for Authentication.
- Engineered a secure and scalable RESTful API on the backend using Node.js and Express.js to manage product data, inventory, and user profiles.
- Implemented user authentication and authorization (signup/login) using JSON Web Tokens (JWT) and bcrypt for secure password hashing.

2. ApniRIDE : car rent Platform

- Technologies: React.js, Node.js, Express.js, MongoDB, Redux (for state management), JWT for Authentication.
- Integrated third-party payment gateway (e.g., Stripe/Razor pay sandbox) for process
- Developed a dynamic, responsive frontend using React.js with Redux for centralized state management, resulting in a seamless shopping experience.

EDUCATION

Bachelor of Computer Applications

july-2024 -present

Palwal, Haryana

Current Percentage/CGPA: | [e.g., 78% or 8.5/10] |
